**FAIRY'S CAROUSEL**

Wooden carousel with a round base and a crossed-over wooden centre post. This carousel requires only a little space (Ø 640 mm) and is a favourite with kids year after year. The carousel offers a thrilling ride that will make heads spin. The Fairy's Carousel will develop kids' balance in a fun way.

**HIDE AND SLIDE**

The low bottom step and gentle angle of the stairs invite even a one-year-old toddler to climb the stairs. The window opening at the top of the hut is framed with a pretty leaf design, and the slide back down guarantees perfect fun. One of the two walls is a fence wall, and the full-height boarded wall has a window so that kids can be easily supervised at all times. The full-height wall also serves as a fun and easily supervised element for play on ground level. The steeply pitched roof and curved roof plane are influenced by mediaeval Scandinavian designs, scaled down to suit children. The small wooden slide with a steel sliding surface complements the structure beautifully. The window frame adds a welcoming and bright accent to the design.

**SPELL HILL**

Spell hill looks quite tame, but thanks to the two different sized towers, grand slides and numerous climbing features it excites players again and again!

The transfer between the towers is a thrilling challenge with a 2.5 m long, slightly slanted net bridge with handrails, and it is the only way to the second tower. The towers reach up to almost 4 metres. The second tower has a U-shaped net underneath for climbing or just hanging out with friends. It can be accessed from the ground.
